

# RS-S2H JANUS

## TACTICAL COMPUTER SYSTEM

## OVERVIEW

The RS-S2H Janus Tactical Computer System was designed by Rugged Science with direct input from America's elite warfighters. The system packages the most powerful 6th generation Quad Core™ Intel® Xeon™ processors into a rugged, lightweight Pelican™ brand 1525 Air Case that is ready to deploy in the harshest operating environments.

Janus features dual Hi-Bright backlit LCD displays (with optional resistive touchscreen) at 1000 nits mounted to an innovative internal armature that isolates shock and vibration, and quickly folds open or closed for rapid transit. The internal PC is a fanless design with an extra large heat sink for exceptional thermal performance. The Janus is available with up to 32 Gb RAM, and boasts a -20°C to 60°C operating temperature range. In real-world tactical operations, SWAP is always a top concern; at less than 30 lbs. Janus systems are among the lightest and most powerful tactical computer systems available.
